Area of Interest

Full-Stack Engineering, Systems Programming, Web3 Development, Cloud Engineering, Agentic AI

Education

Year	Degree / Examination	Institution / Board	CGPA / %
2026	B.Tech. 2nd Year	Indian Institute of Technology, Roorkee	7.494
2024	Intermediate (Class XII)	New High School and Junior College, Chauka, Chhatrapati Sambhajinagar, Maharashtra	86.67 %
2022	Matriculate (Class X)	Jawahar Navodaya Vidyalaya, Kannad, Aurangabad, Maharashtra	92.20 %

Projects

SyncSpace | MDG Space IITR May 2026 – June 2026
- Built real-time collaborative notes and code editor using Yjs CRDTs over a custom Hocuspocus WebSocket server with Postgres snapshot persistence.
- Designed a per-run Docker sandbox for untrusted Python execution with network isolation, read-only filesystem, memory/PID limits, and wall-clock timeout.
- Enforced multi-tenant isolation via Postgres row-level security; deployed three services across Vercel and Railway.

Repository Structure Analysis and Visualisation System | Google Development Society Chapter IIT Roorkee June 2026 – July 2026
- Built a repo visualization tool (FastAPI + React/React Flow) mapping inter-file dependencies parsed with the Python ast module.
- Added circular-dependency detection (networkx) and click-to-focus highlighting on an interactive graph canvas.
- Integrated a cached LLM layer for context-aware, plain-English file summaries.

Vision-Powered Score & Leaderboard Tracking System | Esports IITR March 2026 – April 2026
- Built a full-stack app (FastAPI, React, Postgres) that extracts BGMI match results from screenshots via a Groq vision-language model, with a human-in-the-loop review step before saving.
- Designed set-based fuzzy matching (RapidFuzz) to map players to team rosters, robust to model misreads and non-Latin names.
- Added config-driven scoring and cumulative standings with CSV/PNG export.

Paygent — Agentic Payments & DeFi Automation Platform | HackMoney 2026 (ETHGlobal) January 2026 – February 2026
- Developed an agent-driven payment orchestration platform for automated liquidity allocation and on-chain settlements.
- Implemented ENS-based strategy management and smart contracts for vault, payment, and settlement workflows.
- Won the Integrate ENS Prize at HackMoney 2026 for innovative ENS integration.

LuxuryAuthNFT — On-Chain Luxury Goods Authentication | ETHOnline 2025 (ETHGlobal) · *Sept 2025*
Built an NFT-based provenance system pairing physical luxury items with ERC-721 certificates, with brand-gated minting and a public verification flow via QR code or product hash.
Wrote Solidity contracts with Foundry covering brand verification, authenticated minting, and ownership transfer; pinned immutable item metadata and images to IPFS.
Shipped a Next.js + Tailwind frontend with four surfaces: admin brand-verification dashboard, minting portal, public verification page, and owner NFT view.

Awards / Scholarships / Academic Achievements

- **HackMoney** 2026 (ETHGlobal): **Won** the **ENS** partner prize for **"Paygent V2,"** built during **ETHGlobal's** online hackathon**.**
- **ETHOnline 2025 (ETHGlobal)** — Built *LuxuryAuthNFT*, an on-chain authenticity layer for luxury goods pairing each physical item with an ERC-721 certificate; Solidity/Foundry contracts, IPFS metadata, Next.js verification portal

Skills

Languages	C++, Python, TypeScript, JavaScript, Solidity, Rust, SQL, CSS
Frameworks & Libraries	React, FastAPI, Node.js, Foundry, wagmi, viem, OpenZeppelin, Tailwind CSS
Tools & Platforms	Git & GitHub, Docker, Linux, Postgres, MongoDB, MySQL, Postman, Vercel, Railway, Figma, Obsidian, Claude Code, Jupyter Notebook, VS Code
Languages Known	Hindi (SRW), English (SRW), Marathi (SRW)

Positions of Responsibility & Extra Curriculars

Operations Team | Esports IITR November 2024 – Present
- Coordinated on-ground operations and crowd management for esports events and tournaments, ensuring smooth, incident-free execution.
- Handled end-to-end event planning including venue setup, scheduling, and logistics.
- Developed a tool to automate score and points tracking across tournament matches, reducing manual effort during live events.
- Contributed to promotional video content showcasing the club's events and esports culture.

Coordinator | Cognizance, IIT Roorkee March 2026
- Spearheaded the esports vertical of the annual technical fest — tournament logistics, participant registrations, match scheduling and inter-college coordination across 100+ institutions.
- Managed live event operations including crowd coordination, match supervision, and rapid issue resolution.

Volunteer | Navodaya Cell, NSS IITR October 2024 – May 2025

- Taught Mathematics to Class 5 and Class 8 students preparing for the JNVST exam, as part of an NSS social outreach initiative.
- Designed mock test papers modeled on the JNVST pattern to assess student progress and strengthen exam readiness.
